Quantum Teleportation

Alex Heilman

No-Cloning Teleportation Experiment Recap

Now, let's define $|\phi\rangle = |0\rangle + |1\rangle$:

Consider the following action of a 'copy' on the basis states:

$$\begin{array}{l} |0\rangle \rightarrow |0\rangle \otimes |0\rangle = |00\rangle \\ |1\rangle \rightarrow |1\rangle \otimes |1\rangle = |11\rangle \end{array}$$

Quantum Teleportation

Alex Heilman

No-Cloning Teleportation Experiment Recap

Now, let's define $|\phi\rangle = |0\rangle + |1\rangle$:

$$egin{aligned} &\phi
angle
ightarrow &|\phi
angle \ &= ig(|0
angle + |1
angleig) \otimes ig(|0
angle + |1
angleig) \ &= |00
angle + |01
angle + |10
angle + |11
angle \end{aligned}$$

・ロト ・ 同ト ・ ヨト ・ ヨー・ つへぐ

Consider the following action of a 'copy' on the basis states:

$$\begin{array}{l} |0\rangle \rightarrow |0\rangle \otimes |0\rangle = |00\rangle \\ |1\rangle \rightarrow |1\rangle \otimes |1\rangle = |11\rangle \end{array}$$

Quantum Teleportation Alex Heilman

No-Cloning Teleportation Experiment Recap

Now, let's define $|\phi\rangle = |0\rangle + |1\rangle$:

$$egin{aligned} &\phi
angle
ightarrow &|\phi
angle \ &= ig(|0
angle + |1
angleig) \otimes ig(|0
angle + |1
angleig) \ &= |00
angle + |01
angle + |10
angle + |11
angle \end{aligned}$$

But, due to the linearity of the transformation we should also have:

$$|0
angle+|1
angle
ightarrow|00
angle+|11
angle$$

Experiment

ASIDE: Causality

Causality refers to the concept of cause and effect; according to Einstein's relativity, nothing can travel faster than light.

Effectively, we shouldn't be able to communicate any information faster than the speed of light or causality is said to be violated.

The necessary transmission of the (classical) information describing the measurement outcome of party A guarantees that causality is preserved.

Quantum Teleportation

Alex Heilman

No-Clonin

Teleportation

Experiment

Alice begins with state $|\psi\rangle = \alpha |0\rangle + \beta |1\rangle$ and receives one half of the entangled Bell pair $|+\rangle = (|00\rangle + |11\rangle)/\sqrt{2}$

Quantum Teleportation

Alex Heilman

lo-Cloning

Teleportation

Experiment

Teleportation 2 (a)

Alice applies a controlled X gate on her qubit state (as control) and her half of the entangled pair (as target)

$$\frac{1}{\sqrt{2}} \big[\alpha (|000\rangle + |011\rangle) + \beta (|101\rangle + |110\rangle) \big]$$

Quantum Teleportation

Alex Heilman

lo-Cloning

Teleportation

Experiment

Recap

・ロト・西ト・山田・山田・山下

Teleportation 2 (b)

Alice then applies a Hadamard (H) gate on her qubit state

Quantum Teleportation Alex Heilman

No-Cloning Teleportation Experiment

 $\frac{1}{2} \big[\alpha (|000\rangle + |011\rangle + |100\rangle + |111\rangle) \\ + \beta (|001\rangle + |010\rangle - |101\rangle - |110\rangle) \big]$

◆□▶ ◆□▶ ◆ 臣▶ ◆ 臣▶ ○ 臣 ○ のへぐ

Alice then measures her qubit and her half of the entangled qubit

Quantum Teleportation

Alex Heilman

No-Cloning Teleportation Experiment

Recall that the total state before measurement is proportional to the following:

 $lpha(|000
angle+|011
angle+|100
angle+|111
angle) \ +eta(|001
angle+|010
angle-|101
angle-|110
angle)$

Quantum Teleportation

Alex Heilman

No-Cloning Teleportation Experiment

Recall that the total state before measurement is proportional to the following:

```
lpha(|000
angle+|011
angle+|100
angle+|111
angle) \ +eta(|001
angle+|010
angle-|101
angle-|110
angle)
```

Let's now consider what such measurement results tell us about the resulting state (which Bob is in possession of):

・ロト ・ 同 ト ・ ヨ ト ・ ヨ ・ つ へ ()

Quantum Teleportation

Alex Heilman

No-Cloning Teleportation Experiment Recap

Recall that the total state before measurement is proportional to the following:

```
lpha(|000
angle+|011
angle+|100
angle+|111
angle) \ +eta(|001
angle+|010
angle-|101
angle-|110
angle)
```

Let's now consider what such measurement results tell us about the resulting state (which Bob is in possession of):

So, Alice may transmit her measurement results (classically) to Bob, and he will know exactly what state he has with regards to Alice's arbitrary initial state. Quantum Teleportation

Alex Heilman

No-Cloning Teleportation Experiment Recap

Bob then tailors his gate application according to Alice's results:

Quantum Teleportation

Alex Heilman

No-Cloning

Teleportation

Experiment

Recap

・ロト・日本・日本・日本・日本・日本

Bob then tailors his gate application according to Alice's results:

A sends result
$$|00\rangle \rightarrow \alpha |0\rangle + \beta |1\rangle$$
 Bob applies nothing
 $|01\rangle \rightarrow \alpha |1\rangle + \beta |0\rangle$ Bob applies X
 $|10\rangle \rightarrow \alpha |0\rangle - \beta |1\rangle$ Bob applies Z
 $|11\rangle \rightarrow \alpha |1\rangle - \beta |0\rangle$ Bob applies XZ
